

# BURNERS & CONTROLS

*The simple solution --- powerful, cost-effective burners  
with state-of-the-art modulating controls from  
Lubbock Electric Co.*

Don't throw out your entire system when all you need is a burner or two. Lubbock Electric's burners are available in 4 Million, 8 Million, or even 12 Million BTU configurations. The rectangular burner barrels are appropriately sized for the air flow and the control cabinet consists of standard components from the leading manufacturers in the flame safety and gas control industry. Ginner controls can be furnished in a wall mount enclosure or custom mounted in the gin's existing console.

**4 Million BTU Burner  
with  
Burner Management  
Control Cabinet**
