

Irrigation Equipment from LECO

- **Square D Pump Panels**
- **WorldWide Electric Motors**
- **Proven Reliability and Quality**
- **Cost-Effective**
- **Electrical Installation Available**

Benefits of electric motors...

REDUCING FUEL / ENERGY COSTS

The use of electricity instead of fossil fuels is increasingly advantageous in both the short and long term. In addition, government and regional utilities are adding additional incentives to make electricity even more appealing.

REDUCING EQUIPMENT & MAINTENANCE COSTS

With the advancing technology of Square D switchgear, maintenance issues and downtime for panels have been dramatically minimized. Compared to engines, which often require monthly maintenance, pump panels and motors can go years without preventative maintenance. Further simplifying this is the ease of assembly, replacement and interoperability of electrical products...even in the field.

MINIMIZING ENVIRONMENTAL IMPACT

Air pollution and ground water contamination from fossil fuel engines can result in expensive fines and poor publicity. Current incentives to reduce the effects of these pollutants will eventually lead to binding regulations, requiring companies to either update, replace or somehow counteract the damage older equipment will have. Taking a proactive approach to adopting new, more environmentally friendly solutions that use electricity during regular product upgrades will help avoid future replacement cost of older equipment.

WorldWide Vertical Hollow Shaft Motors

- 25-250 Horsepower
- Non Reverse Ratchets
- High Thrust Bearings
- Two Year Warranty

Square D Well-Guard Pump Panels

- 3-200HP NEMA Contactor
- Hand-Off-Auto w/Start Control
- NEMA 3R Enclosures
- Approved for Sub Pumps

Lubbock Electric Co.

LECO **Lubbock Electric Co...** motors, controls, and much more

With the price of fossil fuel on the rise, and the price of a kilowatt-hour of electricity at roughly 7-10 cents, the economic incentive to switch from petroleum products to electricity has never been more apparent.

Call today for a prompt, courteous quote---and let's get pumping!
